

# Reading Makes Everything Possible

Kids are first introduced to books and reading through their homes and schools.

Yet many kids' early literacy experiences aren't fully responsive to individual needs. For example...

**Only  
56%**

of school-aged kids with a school library say there are enough books they want to read.

**Because of systemic barriers that often fall along racial and socioeconomic lines, many students don't have access to the early literacy resources they need.**

As a result, millions of students in elementary school are not reading at grade level

**Only 31%**

of fourth graders in the US are reading at a proficient level.

Research shows that **WHEN STUDENTS CAN READ** at grade level entering fourth grade, they are

more likely to graduate from high school ...opening doors to limitless possibilities for their futures.

**READING  
PARTNERS**

Reading Partners steps in before this pivotal moment, offering individualized tutoring and other literacy support to K-4 students who build their reading skills and confidence.

**Supporting Reading Partners is an investment in our future leaders.**

**For every \$1** invested in the program, Reading Partners **more than doubles**

that value in the form of literacy resources delivered to students.

**Together, let's make reading accessible for all kids.**
